Faculty mentor:
James Gross

Research supervisor(s) (name, position, email):
Jennifer Yih, Postdoctoral Scholar, jyih@stanford.edu

Project topic(s):
Effects of emotion and emotion regulation on face processing

Brief description of scientific issues:
Does emotion influence the way we view and remember faces? Our research uses a combination of behavioral and physiological methods to answer this question and other related lines of inquiry.

Skills required:
- Strong problem-solving skills
- Creative thinking
- Enthusiasm for learning programming

Skills to be learned:
- How to be a consumer of scientific research
- MATLAB programming
- Data analyses
- Data visualization
- Research presentation

# Hours/week (up to 40hrs/wk):
40 hours/week
