

Faculty mentors: Hazel Markus and Jennifer Eberhardt

Research supervisor(s):

Rachel Song (Lab Manager, rachelxsong@stanford.edu)

Lucy Bencharit (Research Scientist, ylzhang@stanford.edu)

Amrita Maitreyi (Research Associate, amritama@stanford.edu)

Maggie Perry (Research Associate, mperry3@stanford.edu)

MarYam Hamedani (Managing Director, maryamh@stanford.edu)

Rebecca Hetey (Research Scientist, rhetey@stanford.edu)

Project topic(s): Social psychology applied to real-world contexts

Brief description of scientific issues:

Stanford SPARQ is a "do tank" that partners with industry leaders to tackle disparities and inspire culture change using insights from behavioral science. We work in criminal justice, education, economic mobility, and health. Current projects that undergrads can be involved with include improving police-community relations, addressing racial bias in investment decision-making processes, and understanding how indoor spaces impact occupants' psychological and physical wellbeing.

Skills required:

No previous research experience necessary! Basic working knowledge of psychology (PSYCH1) is preferred.

Skills to be learned:

Running experiments, subject recruitment, qualitative data coding, data entry, survey design, literature review

Part time
