Research Assistants: Stanford Psychophysiology Laboratory

**Lab:** Stanford Psychophysiology Lab (SPL)  
**Lab Website:** www.spl.stanford.edu  
**School/Department/Program:** Stanford University  
**Supervising Researcher:** Dr. Katya Fernandez

---

**Project Description**

The main purpose of the pilot study I’m heading is to assess the feasibility of collecting self-report and behavioral data simultaneously in a naturalistic environment. My ultimate goal is to further understand the psychological (including affective and behavioral) and psychosocial consequences of emotional experiences as they unfold in real time.

---

**Duties & Time Commitment**

RAs will assist with creating experiment materials, subject recruitment, data collection, coding of audio recordings, and other research duties (as interested). Minimal commitment is 6 hours/week.

---

**Qualifications & Skills**

Ideal candidates are reliable, highly motivated, detail-oriented and able to work independently. Previous research experience (including familiarity with Qualtrics) is preferable but not required.

---

**Compensation**

Course-credit or volunteer

---

**To Apply**

Please send your resume, a brief summary of your research interests, and your weekly availability and desired start date, along with any questions, to Katya Fernandez at katyaf@stanford.edu.
